

### **Telehealth and Remote Service Policy**

The Sensory Play Clinic provides telehealth and remote Occupational Therapy services across Australia. All sessions are conducted via secure, encrypted platforms to protect client confidentiality. Clients will provide consent for telehealth prior to commencement and will be informed of the process, benefits, and limitations.

Remote assessments such as the Sensory Profile may be completed through secure email, phone consultation, or video conferencing. Clients are responsible for providing accurate information and ensuring a quiet, safe environment during any virtual assessment or consultation.
